2020 IAGD ANNUAL MEETING

“Oral Surgery for the General Dentist: Easier and More Predictable”

with

Dr. Karl Koerner & Dr. Andrew Drollinger

LECTURE COURSE

Friday, March 6, 2020

7:45 a.m. – 5:15 p.m.

Hilton Garden Inn

8600 Northpark Drive, Johnston, IA 50131

HANDS-ON COURSE

Saturday, March 7, 2020

8 a.m. – 8 p.m.

Sunday, March 8, 2020

8 a.m. – 1 p.m.

Patterson Dental Supply

955 SE 29th Street

Grimes, IA 50111

SPEAKERS

Karl R. Koerner, DDS, MS

Dr. Koerner is an Adjunct Professor in Oral Surgery at Roseman University of Health Sciences, College of Dental Medicine in Utah and the Co-founder of the Koerner Center for Surgical Extractions (KCSI). He has presented hundreds of didactic and participation oral surgery courses in the U.S. and around the world -- speaking about twice a month at dental meetings both large and small. Dr. Koerner is the author of many articles on various aspects of oral surgery for the general dentist and has authored or co-authored four books on oral surgery. In addition, he has made several surgery DVDs with Dr. Gordon Christensen. He is past president of the Utah Dental Association and Utah Academy of General Dentistry. Though not an oral surgeon, Dr. Koerner received surgery training in the U.S. Army where he completed a general practice residency. He was given the National AGD's Weclaw award for his contributions to dentistry and dental education and the Utah Dental Association's Distinguished Service Award. He conducts regular dental humanitarian projects in various parts of China

Andrew G. Drollinger, DDS

Former full-time oral surgery faculty at Roseman University College of Dental Medicine, Director of Utah Oral Surgery Services, and one of the instructor with the Koerner Center for Surgical instruction. Dr. Drollinger has presented didactic and participation oral surgery courses for dental societies, AGD meetings, and private group practices. His hands-on courses use life-like models on which participants do several different surgeries. Though not an oral surgeon, he has practiced oral surgery for the majority of his career. Dr. Drollinger recently relocated to Houston where he has a practice limited to oral surgery and sedation. He previously completed a one-year oral surgery internship, a two-year AEGD residency, and a two-year orofacial pain & dysfunction residency---all at the University of California Los Angeles. He received his dental degree from the University of Maryland.

Oral Surgery for the General Dentist: Easier and More Predictable

LECTURE

FRIDAY, MARCH 6, 2020

7:45 AM TO 5:15 PM

8 hrs AGD Oral Surgery Lecture credit - IDBE pending approval

Many extractions look easy but can soon become difficult, time consuming, and lead to complications. This course reviews the best techniques and instruments to remove "surgical" extractions easily and quickly **while conserving bone**. From that primary emphasis, Dr. Koerner branches to other related surgery subjects that use many of the same instruments and principles.

These include:

- The most common suturing techniques and materials,
- avoiding sinus problems,
- predictable socket grafting techniques (without company hype),
- ridge preparation for immediate dentures,
- bleeding management during surgery,
- a review of moderate third molar impaction essentials (anatomy and step-by-step guidelines).

COURSE OBJECTIVES

As a result of attending this course, the dentist will be able to:

1. More easily do "surgical" or difficult extractions that frequently occur in general practice.
2. Be more proficient at ridge preparation for immediate dentures.
3. Select appropriate socket grafting cases and have the knowledge to do them successfully.

4. Prevent and/or manage bleeding problems that can occur during oral surgery.
5. Better understand patient selection and risks of third molar surgery.
6. Perform oral surgery according to current standards of care.

HANDS-ON TRAINING

SATURDAY, MARCH 7, 2020

8:00 AM TO 8:00 PM

SUNDAY, MARCH 8, 2020

8:00 AM TO 1:00 PM

This workshop builds on the Friday lecture. It applies the surgical principles covered already -- to use on life-like dentofom models.

The following procedures will be done on the models:

- full-thickness mucoperiosteal flaps (envelope and triangular),
- suturing (interrupted/surgeon's knot, cross-suture, continuous-lock)
- surgical extractions (multiple root-top removals with several different methods),
- Alveoplasty,
- Socket grafting (bone graft and barrier membrane)
- Moderate third molar impaction (mesioangular),
- Excisional biopsy
- Incision and drainage
- Anxiety control for apprehensive surgery patients

- I & D in general practice, discussion of antibiotic usage
- Incisional/excisional biopsies
- Bisphosphonates
- Other discussion as time permits

COURSE OBJECTIVES

In addition to the course objective on Friday, the dentist will also be able to:

1. Control patient anxiety related to oral surgery.
2. Correctly perform I & D's on the less-invasive abscesses.
3. Do easier third molar impactions.
4. Perform oral surgery according to the current standards of care.
5. More easily and quickly do "surgical" or difficult extractions that frequently occur in general practice.
6. Be more proficient at ridge preparation for dentures following multiple extractions.
7. Prevent and/or manage complications that can occur during oral surgery such as bleeding, sinus problems, and tuberosity fractures etc.
8. Perform predictable socket bone grafting.

PACE
ACADEMY of
GENERAL DENTISTRY
PROGRAM APPROVAL
FOR CONTINUING
EDUCATION

The AGD-Iowa is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by AGD for Fellowship, Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry. The current term of approval extends from 1/1/2018 to 12/31/2021. ID# 219301

FAGD/MAGD Approved
1/1/2018 to 12/31/2021
